

## EXHIBIT D

### Plan of Public Involvement Activities

Under the Model Toxics Control Act, Chapter 70.105D.020(18), Ecology is required to notify the public of key steps in the cleanup of contaminated sites. There are also certain requirements that apply to activities conducted under a consent decree.

Ecology will perform the following public involvement activities for the Handy Andy #8 site:

**Public Hearing:** Ecology will hold a public hearing in Vancouver, Washington, during the public comment period. At the hearing, oral comments will be taken as part of the official record.

**Fact Sheet:** Ecology will prepare a fact sheet that will be mailed to those interested and those living near the site. The fact sheet will announce the time period of the public comment period and the date, time, and location of the public hearing, as well as key information about the site. In addition, the fact sheet, consent decree, and cleanup action plan will be available for viewing on the Internet at [www.wa.gov/ecology/tcp/cleanup.html](http://www.wa.gov/ecology/tcp/cleanup.html).

**Newspaper Advertisement:** Ecology will prepare a legal notice for the Vancouver Columbian. The notice will detail the information presented in the fact sheet.

**Site Register:** Ecology will prepare a notice for its bi-monthly periodical, the Site Register. The Site Register, which announces all public comment periods and public hearings, will be available on the Internet at [www.wa.gov/tcp/tcp/ecology/cleanup.html](http://www.wa.gov/tcp/tcp/ecology/cleanup.html).

**Repository:** Ecology will make all documents pertaining to this stage of the cleanup available for public review and comment at the Fort Vancouver Regional Library and at its Vancouver Field Office. Additionally, the entire site file will be available for review at Ecology's Southwest Regional Office in Lacey.

**Responsiveness Summary:** Following the public comment period and public hearing, Ecology will write a Responsiveness Summary that will address all comments received during the public comment period. Ecology will announce the availability of the Responsiveness Summary in the Site Register. If sufficient comments are received, an additional fact sheet citing the summary's availability will be prepared and mailed to the public.
